Why we should leave the European Union

London, 23.06.2016, 00:10 Time

USPA NEWS - I have to address nothing but the senses of the British people.

Are we really losing our minds to waist this massive opportunity and not leave the EU.

We have the chance of a life time to get rid of the German control on us and our country and we have to act on it and use it.

I have to address all the people who lost the weight of their heads and trying to convince the British people to stay under the German influence and Brussels control.
Mr Hammond, the foreign affairs secretary talking about losing control on Gibraltar if we exit. That is the most idiot idea a person in his position would say.
Mr. Phillip Hammond is forgetting that he is talking about Great Britain. He actually undermines the country that is supposed to be representing.

Great Britain is the one who fought two great wars to get rid of the German occupation to Europe and their hopes to put the whole of Europe under its influence and control.
To achieve this, Britain gave hundreds of thousands if not millions to fight the German advances.

Now, David Cameron, George Osborn, Jeremy Corbyn and many others are pushing really hard trying to convince the people of this country to vote to stay in this country. I don´t know what to call this. I found this unbelievable and indeed not acceptable.

David Cameron is trying this even after his huge failure in getting anything of use out of the whole month negotiations with Europe. He is saying now, we better stay in and get what we want through negotiations. He of all the people convinced that he can get absolutely nothing out of this Europe.
Do not give them the pleasure of success in this odd request.

Those people who are trying to convince us to stay in Europe don´t love this country a bit.
Those people are in denial of the place and influence of Great Britain on the world theatre.
They are forgetting that Britain is the fifth largest economy in the world.

Great Britain is one of only 5 nations in the world holding the permanent seat on the UN security council and can apply a veto on any decision anytime there is a voting in this council.
They forget that Britain is the first financial centre in the world. Second comes New York and the threats if there is any might be from Asia´s Singapore and Hong Kong. There is no country in Europe that might be considered a financial centre on the world stage.
I think the remain camp are forgetting these facts.
It is an open secret that Germany is manufacturing in Turkey, Hungary, Romania, Poland & Czech Republic. Other places are serving same purpose.
No one can stop like Great Britain. Let us not forget this fact when we go to cast our vote.
Vote Leave.
